outside sources and less favorable reports from other places, the market here opened with buyers asking sharp concessions in prices. Salesmen were inclined to accept a reasonable decline on account of the existing unfavorable conditions, but they were reluctant in granting all that buyers | VERY LITTLE DOING ON NEW YORK asked. Therefore the trading was inclined to be sluggish all day and it required a considerable effort to make a satisfactory clearance. There were some few transactions that were possibly not to exceed 5c lower, but practically all mixed grades sold 10c below yesterday, and in a few Pence in South Africa Has Not Yet extreme cases for very ordinary hogs there was possibly 15c change. The receipts to-day were about 100 smaller than a week ago and over 400 larger than a year ago. The quality was about like the average represented heretofore this week. The market opened with about the usual number of buyers in the field, and although there was no really urgent competition developed the demand was steady and all strictly fat stock sold as promptly as expected at quotably unchanged prices. Half fat sheep and lambs were not wanted to any extent and therefore had to sell at easier figures. Spring lambs sold as high as \$8.50, and other sales ranged from \$4 to \$6.25. The better grades Member New York Stock Exchange of sheep were reported at \$4.50@5, and stockers to decent kinds sold from \$2.25 to \$4.25. The standard price for bucks seems to have been \$3. No changes are to be noted in the cattle market from those prevailing during the first half of the week. The demand for choice butcher stock is strong at all times, but there is little outlet for the common greasy stuff. No good cattle were offered to-day, the supply being made up of stockers and ordinary butcher grades. All offered were disposed of in good season, the market closing quiet and terest and are more secure—they are secured by steady. The calf market is steady, with best selling from \$6 to \$6.50. STOCK EXCHANGE.

Affected European Markets-Record of Fluctuations.

NEW YORK, June 6.-The dealings in stocks dropped back again to near the low level of activity for the year, and the day's net changes are narrow and unimportant. So far as they are gains they are the residue of a little spurt in prices with which \$4.84% @4.84% for sixty days; posted rates, the day started. It was caused by a rumor that the coal strike had been sattled, which came by the way of London with a light volume of cabled orders to buy, the origin of which was as doubtful as that of the ru-This was undoubtedly a ruse, and was designed as a counter move to yesterday's reports set affoat by the bears of the sudden death of an aged financier. The principal buying came from yesterday's short sellers, and as soon as the rumor was authoritatively denied the buying movement fell away and the market fell back into its state of neglect.

There was a sharp raily in Canadian Pacific on a resumption of the pool operations in that stock, and this movement had some sympathetic effect in the rest of the list. Sugar at one time recovered all of its quarterly dividend on the score of an advance in prices in some grades of sugar. None of these movements was maintained. The later market was inclined to depression. Opinions from abroad are current that there will be no notable revival in foreign markets as an effect of the declaration of peace until after the English coronation. The continuance of the coal strike, which seems to promise indefinite prolongation, will also be a damper on any speculation. The assembling of the soft-coal miners in the Virginia and West Virginia fields, and reports that they will go on strike, give color to the apprehension of an extensive spread of labor troubles. The strength of \$150,000,000 gold reserve in the division of reto-day's market and the reports which ac- demption, shows: companied it of excessive rains and floods posibilities of future mishaps to the corn ! crop and an incentive to caution against speculative commitments on that score. The bank statement promises to be color-

less. There have been sufficient receipts on balance from the interior to about offset the week's \$2,000,000 loss on subtreasury operations. There is no indication of any substantial reduction in the loan account of the banks, and some institutions report an increase in that item. A reaction in foreign exchange was viewed with satisfaction and relieved the apprehension caused by the week's advance of a disposition by foreign lenders to withdraw credits. The market closed stagnant.

The bond market was also less active, and the movement of prices narrow and irregular; total sales, par value, \$2.650,000, of Reading by a broker often used by im-United States bonds were all unchanged on | portant interests. There was no expla-

Wheat got a firm start from the appear-

ance of the weather map. The Southwest had too much rain and the entire Western wheat and corn country reported copious showers. This caused talk of a wet harvest, rust and other damage to crops. Cables were weak following our decline yesterday, but July opened a shade higher to BAYTIMORE .- Money, 5 per cent. Clearunchanged at 71%c to 71%@71%c and sold to 72c. Snow's report that the yield of both winter and spring crops would approximate 725,000,000 bu-or only 25,000,000 bu under last year's enormous production-was like a wet blanket. Bears sold, bulls PARIS .- Three per cent. rentes, 101f 80c for stopped buying for the time and July sunk to 71%c. This same report indicated an improvement of 5 points in the June condition and stated that the spring wheat was in almost perfect condition, save that the acreage was 1,000,000 less than last year. Conditions inherent to the pit were almost bearish, but they seemed to have little effect. Receipts were liberal, the cash demand was very poor, with prices shaded here and at Duluth. The outsider was not in Friday's statement of the treasury balances in the general fund, exclusive of the the pit. The wet weather talk, however, with firmness in corn and oats, helped wheat, and July reacted well after its dip. relations of the caller and the called so just and so sensible that all may accept it as the final law on the subject, and, so accepting, abide by it? Mr. Smith, a busy man of business, summons his office boy, and says, "Please get Mr. Jones on the wire." The boy does as directed. It happens that medium grades and combing, 12618c; light fine, neither man has attained the luxury of a desk set. Accordingly, when Jones is informed by his boy that Mr. Smith wants to talk to him over the telephone he lays aside what he is doing and walks to the instrument. There he hears the familiar "Hold the wire a minute, please," and waits patiently, or, perhaps, impatiently, until Smith is notified that Mr. Jones is "on the wire," and goes to the telephone in his turn, Certificates have been issued to the following- Jones has wasted some seconds or minutes perhaps of his valuable time. Smith, on the other hand, has lost no time. He could have saved Jones the waiting by directing his boy to call up Jones's office and ascertain if he were in. Receiving an affirmative an-Increase, Restoration, Reissue, etc.-Marion swer, he could then have stepped to the telephone and called for Jones, waiting himself until Jones responded. But in that case Smith would have waited, and Smith doesn't care to stand around any more than Jones does. Little vexations, like great problems, depend so much on the point of view. What we need is a system of rules that shall be equally respected by Smith burn, \$14; Samuel Swygart, Elkhart, \$10; Wil- and Jones, whether either be the seeker or

The New Yorker and the Country.

New York Commercial-Advertiser, There is something pathetic in the New Yorker's country fad. It isn't the joyous, childlike love of nature and freedom from restraint that sends the Parisian flying countryward every Sunday. It is a less primitive, more strenuous impulse. It is a self-conscious, almost conscientious stinct. It isn't love of nature. The New Yorker loves his bricks and mortar, and the New York slave is rather proud of his chains. The hurry and scurry to be off somewhere, anywhere out of the city, which have taken possession of every one of late years is a malady like another. It is a nervous disease made up of two-thirds fashion and one-third restlessness. Waterfalls and buttercups and green fields and babbling brooks don't enter into it at all. They are in the guide books and in the country, but they are not what sends the thoritative manual on "Telephone Eti- | tired cityites wildly flying after trains as
